

# Harnessing AI in Trading – How NeoTrader's Next-Gen Platform is Disrupting the Status Quo

Category: Business

written by International Khabar | February 14, 2025

With algorithmic trading accounting for nearly 60% of total market volumes in India, the demand for AI-powered platforms is at an all-time high. Artificial intelligence is no longer just a buzzword in the financial world-its rapidly transforming how markets operate. While institutional investors and hedge funds have long used AI-based trading models, this technology is now reaching retail traders, giving them access to professional-level tools. Today's retail investors need more than raw data; they want actionable insights, [instant market](#) analysis, and risk management

strategies in easy-to-understand formats. This evolution has given rise to AI-powered trading platforms, with NeoTrader leading the way.

### **AIs Growing Role in Trading**

AI [technology](#) has revolutionised the trading field. What began as basic algorithmic trading has evolved into sophisticated deep learning models that achieve remarkable accuracy in predicting market trends.

These AI systems analyse historical market data to identify patterns and generate automated trading signals far faster than any human analyst could.

The surging demand for AI trading tools is driven by:

- Increasing global market complexity

- The need for swift, data-driven trading decisions
- New retail traders seeking expert insights despite limited financial experience
- The rise of commission-free trading, making high-frequency strategies more accessible
- SEBI's proposed framework to allow retail investors to participate in algo trading via stock brokers

According to a report by SEBI, proprietary traders and foreign investors dominate the algorithmic trading landscape, with retail participation still in its early stages. However, platforms like NeoTrader are changing the status quo by bringing advanced AI-powered solutions to retail traders.

### **When Technology Meets Four Decades of Expertise**

*"Were not just witnessing change – were seeing a complete reimagining of what's possible in retail trading", declares Dr. C.K. Narayan, Founder of NeoTrader and a market veteran whose four-decade journey through India's financial markets has been groundbreaking. "The traditional barriers between institutional and retail trading capabilities are not just lowering – they're disappearing entirely."*

This vision materialized as NeoTrader, where advanced AI technology combines with deep [market knowledge to deliver powerful trading solutions](#). By integrating real-time analysis, predictive modeling, and automated trading signals, NeoTrader helps traders make more informed market decisions with greater confidence.

For years, institutions held the upper hand through exclusive access to advanced technologies, data analytics, and market intelligence. Now, through platforms such as NeoTrader, retail traders can access sophisticated AI-powered capabilities that simplify complexity while delivering professional-grade market

analysis. According to various industry estimates, the number of active algo traders in the retail segment powered by tools like NeoTrader has grown by nearly 30% annually over the past five years.

*“The democratization of sophisticated trading tools has been a game-changer,”* **Dr. Narayan** emphasizes. *“We’re seeing remarkable success stories from traders who, just months ago, were complete newcomers to the market.”*

The evolution extends beyond trading tools. Modern platforms increasingly emphasise [educational](#) resources and user empowerment. *“The [future of trading lies in combining powerful technology with proper education](#),”* says **Raja Venkatraman**, Co-founder of NeoTrader, trading coach and trainer in the art of technical analysis. *“We’re seeing unprecedented engagement rates backed by strong [educational](#) foundation in the markets.”*

As India's retail trading community expands, AI's role in [shaping trading](#) decisions will grow accordingly. *“The trend we’re seeing is clear”*, notes **Aditya Iyer, Co-founder and CEO of NeoTrader**. *“Traders who embrace AI-powered tools while maintaining disciplined trading practices are consistently outperforming their peers. It's not just about having powerful technology – it's about using it intelligently.”*

## **The Road Ahead**

The Indian fintech [industry's strong growth](#) potential suggests that AI applications in trading will continue to evolve. This shift in trading practices [marks a significant advancement in India's financial market](#) development. AI's role in democratising market access and improving trading outcomes will only increase as the technology advances.

*“We’re just scratching the surface of what's possible,”* concludes **Aditya Iyer**. *“The integration of human [knowledge and AI technology](#) creates opportunities that were unimaginable just a few years ago. Our users' success stories demonstrate*

*the tremendous potential of this powerful combination.”*

This trading technology revolution represents a paradigm shift, serving as both an essential tool and a fundamental change in retail investors market strategies. As these platforms continue to evolve, they are transforming trading outcomes for market participants across the spectrum.
