Factors Influencing Gold Prices in [India](#)

The daily gold price in [India](#) is influenced by several key factors:

- 1. Global Market Trends:** Gold prices are heavily influenced by global economic factors, such as inflation, geopolitical tensions, and [international financial](#) stability. As a safe-haven asset, gold sees increased demand during times of economic uncertainty, affecting its price in India.
- 2. Currency Exchange Rates:** Since gold is traded internationally in US dollars, any fluctuation in the value of the Indian rupee against the dollar impacts the cost of importing gold. A weaker rupee increases the price of gold in India, while a stronger rupee may lower it.
- 3. Local Demand and Supply:** India's high consumption of gold, especially during [festivals](#), weddings, and

religious ceremonies, significantly influences its daily price. Increased demand pushes prices higher, while a decrease in demand can lower prices.

- 4. Gold Mining and Production:** The supply of gold from mining activities around the [world](#) also plays a role in price fluctuations. Any disruption in mining, such as natural disasters, political instability in gold-producing countries, or changes in production rates, can impact the price of gold [globally and in India](#).
- 5. Government Policies:** Changes in government policies, such as import duties, taxes, or regulations on gold trading, can influence its price in India. Higher [import duties can raise](#) gold prices, while reduced tariffs can lower costs for consumers.

[Impact on Gold Loans](#)

Daily [gold price changes directly influence the loan](#) amount one can secure by pledging gold. Lenders like Bajaj [Finance consider the prevailing market rate to determine loan](#) eligibility. Higher gold prices enable borrowers to access larger funds, while falling prices may reduce the loan amount. [Bajaj Finance](#) offers loan amount ranging from Rs. 5,000 to Rs. 2 crore at competitive [interest rates](#) and free insurance of gold.

What is a [gold loan calculator](#)

A gold [loan calculator is an essential financial](#) tool designed to help individuals determine the loan amount they can secure by pledging their gold as collateral. This calculator [factors in key](#) details, such as the weight and purity of the gold, along with the prevailing market price, to provide an accurate estimate of the potential loan amount.

The [Bajaj Finserv](#) Gold Loan Calculator simplifies this process with a few easy steps:

- **[Enter the gold weight](#)**: Users begin by inputting the weight of their gold in grams.
- **[Input gold purity](#)**: The next step involves specifying the purity of the gold, generally measured in karats.
- **[Provide the current market price](#)**: Users then enter the [latest price of gold](#) per gram.
- **[Loan calculation](#)**: Based on the provided inputs, the calculator [instantly displays the maximum loan](#) amount that can be availed.

This user-friendly tool provides [borrowers with a clear understanding of their loan](#) eligibility before applying, ensuring transparency and avoiding unexpected outcomes during the application process. By offering precise calculations, the [gold loan calculator](#) enables individuals to make informed financial decisions, enhancing their borrowing experience.
